

Whole Life Herbal Pack

TLC's exclusive Whole Life Herbal Pack is a core component of our Whole Life Natural Dog Food, and includes all natural herbs and vegetables to promote heart, digestive, intestinal and circulatory system health, and to provide healthy skin and coat.

-Anise aids in digestion and helps to eliminate gas and bloat.

-

-Apple is high in fiber, which aids in keeping the digestive track clear. It is also a natural source of calcium, iron and Vitamins A, C, and K.

-Cassia aids the digestive system and acts as an antiviral agent.

-Chamomile aids the digestive system.

-Chicory Root Extract provides natural fiber and food for the beneficial bacteria required for a healthy intestinal tract. Benefits may include increased nutrient absorption, digestive aid, and immune system support.

-

-Flaxseed is an excellent source of Omega-3 essential fatty acids, which help to keep the skin and coat healthy, and maintain lower cholesterol levels.

-Ginger to aid digestion, for inflammation control and to provide fresh breath.

-Horseradish is an antibacterial that also adds flavor to the blend.

-Juniper is a gastrointestinal antiseptic that aids in the function of the kidney.

-Kelp is a natural product made from *Ascophyllum Nodosum* seaweed that is harvested from the sea. It supplies natural vitamins and chelated minerals, which increases the immune and glandular systems and improves the digestive capacity.

-Lecithin aids in the absorption of the other ingredients in TLC Whole Life, and helps to improve the condition of the skin and coat.

-Rosemary Extract is a natural antioxidant, supporting the immune system and heart health.

-Tomato increases blood circulation, provides lycopene and acts an antioxidant.

-Thyme is an overall tonic for the functions of the body, and may assist with lack of appetite and indigestion.

-Yucca *Schidigera* Extract is an anti-inflammatory that reduces joint pain and inflammation. It also reduces urine and stool odor

TLC Exceeds The Nutritional Guidelines

The all-natural blend of Whole Life Dog Food, Super-Premium Canine Diet is formulated to exceed the nutritional levels established by the AAFCO (Association of American Feed Control Officials) Dog Food Nutrient Profiles for all stages of your dog's life.

Probiotics & Prebiotics – Whole Life Intestinal Health

Probiotics

Probiotics are dietary supplements containing beneficial bacteria, intended to assist the body's naturally occurring balance of bacteria, thus promoting digestive health. Such beneficial bacteria are commonly found in foods such as yogurt.

TLC Whole Life Natural Dog Food contains three types of Probiotic beneficial bacteria, as follows:

Enterococcus faecium promotes bowel and colon health by helping to counter other toxic bacteria, including *E. coli*.

Lactobacillus Acidophilus inhabits the intestines to protect against unhealthy organisms. As this beneficial bacteria breaks down nutrients in the intestine, it produces lactic acid, and other compounds that make the environment hostile for toxic organisms.

Lactobacillus Casei inhabits the mouth and intestines to protect against unhealthy organisms. *Lactobacillus Casei* may assist in the elimination of the negative *H. Pylori* bacteria, which may be responsible for stomach ulcers and other gastrointestinal ailments.

Prebiotics

Prebiotics are dietary supplements that provide nutrients for the Probiotic beneficial bacteria. TLC Whole Life Natural Dog Food contains Mannan-oligosaccharides which is a type of sugar and Cultured Yeast to provide ideal nutrition for the beneficial bacteria found in TLC Whole Life Natural Dog Food.

Formulated for All Life Stages – The Ideal Protein & Fat Ratio

TLC Whole Life Natural Pet Food is formulated with the ideal protein and fat ratio for dogs (26:16) and cats (32:21), providing the best nutrition for every stage of life.

Other pet food companies offer Puppy and Kitten foods, which are generally higher in fat. However, high fat diets can cause excessive weight gain, leading to joint and skeletal problems in later life.

TLC's ratio protein and fat, is ideal for all stages of a dog and cat's life, from puppy and kitten, through gestation, lactation and senior years.

About Glucosamine and Chondroitin – Whole Life Joint Health

Natural Glucosamine and Chondroitin are two building blocks of cartilage tissue, and can help maintain cartilage for healthy joints and mobility. For this reason, TLC Whole Life Natural Dog Food contains guaranteed levels of natural Glucosamine and Chondroitin, helping your dog maintain healthy joints for a lifetime of activity.

Cartilage is a tissue found at the joint areas, providing the necessary smooth surface and cushion for the movement of articulating bones. Maintaining healthy joint cartilage is essential for mobility and proper joint function, and aids in injury prevention and recovery.

Glucosamine and Chondroitin work together as building blocks of healthy cartilage. Glucosamine is an amino sugar that assists with cartilage formation and repair. Chondroitin is part of a protein molecule that gives cartilage its elasticity and cushioning.

The Glucosamine found in TLC Whole Life Natural Dog Food comes from herring, a deep-water fish found in the North Atlantic Ocean. Our Chondroitin comes from chicken cartilage, sourced from human-grade chicken processing facilities.

Glucosamine and Chondroitin are not only for senior dogs. Wear and tear on cartilage occurs over a lifetime, starting as a puppy. A diet including Glucosamine and Chondroitin will help to support your dog's lifetime joint health.

Please also remember that maintaining the ideal weight for your dog is essential for good joint and skeletal health.
